

“Restore London provided us with invaluable assistance in securing funding for the Project. They offered various costed options and budgets to make the project work for our Client. They were helpful, responsive and the quality of the work produced exceeded our expectations. We would recommend Restore London to anyone.”

Patrick Slaven - Director, Sponsored Restoration Ltd

Scope of Works

Working in partnership with Sponsored Restoration Ltd, Restore London provided detailed surveys with costed options to assist in securing funding. After fully recorded exemplar samples & various traditional repair trials were carried out, this Grade II listed building was cleaned using a combination of nebulous sprays and super-heated steam systems. All essential repairs including stone indents, mortar repairs, pointing of joints and structural opening up works to investigate cracks were successfully completed. Cross-stitching of masonry, and various ancillary works such a lead abutment flashing were also completed ensuring the building masonry is watertight. All works were completed within budget and on time.
