

“Restore London’s use of their site app on this project has facilitated real time information capture & sharing across multiple benefiting the programme & our client.”

Will Swanson, Senior Project Manager – Ainsley & Partners

Scope of Works

As Principal Contractor Restore London successfully tendered, designed, co-ordinated and delivered the complex roof works scheme in this very challenging environment. We installed a full working scaffold, undertook detailed surveys, & subsequently carried out the first phase of the works which involved detailed & synchronized relocation of mechanical & electrical services all while the store stayed live. This enabled the various areas of masonry and roofing to be repaired, restored and/or replaced to flawlessly match the existing.

Where the dilapidations showed signs of greater distress, opening up works were undertaken and the substrate was reviewed/examined along with the Engineers, AKS Ward. Where necessary the steel frame was treated & strengthened appropriately. All ferrous fixtures & fittings were changed or overhauled along with remedial works to the steel windows & full re-decoration.

Project Name:	Heritage Roof Works
Location:	West London
Client:	High end store
Principal Contractor:	Restore London
Duration:	26 Weeks
Completion Date:	June 2017
Value:	£1.4M
