

“Restore London provided a seamless delivery of the external redecoration & roof improvement works at the Bank of Beirut. Their impressive expertise, quality of work and can-do approach was consistently praised by the Client’s Finance and Operations Director. I would highly recommend Restore London for future external repairs, redecorations, and restoration projects with their ensured proactive, interpersonal, and highly professional approach”.

Jonathan Slater – Director, Cyril Leonard

Scope of Works

Restore London were engaged to assess, survey and provide roof drainage improvement works to eliminate ongoing rainwater ingress issues. In addition, our team redecorated the front and rear elevation masonry finishes whilst the building was fully operational. The works required installation of a fixed safe access scaffold to both elevations, followed by cleaning and decorating the external masonry surfaces. The front and rear roof gutter linings were replaced and roof drainage improvements implemented. Finally internal decorations and new floor coverings were completed. All works were completed to highest standard and to the complete satisfaction of the client.
